DISCOVER

THE BENEFIT OF

ATP

Dedicated to helping Nebraskans with disabilities, their families and professionals obtain assistive technology devices and services since 1989.

Home and Community

INDEPENDENCE

For those who rent or own a home, assistance is available for making modifications to help you enter or exit the home, use the kitchen and bathroom, communicate, and depend less on others.

A technology specialist can visit your home to help identify the technology solutions.

Assistive technology devices for the home include: ramps, lifts, wider doorways, and accessible showers and bathtubs.

FUNDING

Financial assistance for home modifications, assistive technology, or services to assist you to live more independently is available. A funding coordinator will help you identify available funding resources and which programs you may be eligible for.

Employment

ENHANCE PRODUCTIVITY

Technology Specialists are available to identify worksite modifications and effective technology solutions through assessments and consumer trial use of technology devices.

On the job assistive technology devices include: assistive computer devices, communication devices, adaptive software, environmental controls, amplification accessories, time management aids, vision aids, and workstation modifications.

Education and Information Technology

SUCCEED IN YOUR SCHOOL

Education services are available to educators, agencies, children and their parents to increase access to appropriate assistive technology devices. Students can try out technology for use at school and to help transition from the school setting into post-secondary education and/or the work environment.

ACCESSIBLE TECHNOLOGY

ATP can help you locate and design accessible technology that allows the end user to understand, interact, and retrieve information in an independent manner. Web accessibility trainings and Section 508 compliant assessments can also be provided.

Services

Information

- Technology solutions, costs, availability, and vendors
- Specialized or adapted vehicles and mobility devices
- Accessible and affordable homes and rentals

On-site Technical Assistance

- Individualized assessments for home and worksite modifications
- Early childhood and school solutions
- Web site assessments for accessibility

Training

- On a wide range of assistive devices
- On early childhood/school age development and technology services
- For accessible web site design

Equipment

- Demonstrations of assistive technology
- Short term equipment loans
- Locating used equipment

Funding

- Locating available funding sources
- Discount purchasing for schools
- Assistance with home purchase and remodeling for accessibility
